

Deschooling (School Detox)

- ❖ There is a reality, those who most need to be out of school are parents. Children adapt more easily to situations. We cannot miss what we have never had because it requires exposure and a change of mind.
- ❖ By deschooling we do not mean the selected methodology, but rather the rigidity of the environment that is created around it, which causes them to take the school home. For example: inflexible schedules, use of uniforms, desks, anti-pedagogical evaluation mechanisms, etc.
- ❖ When we allow children to manage their schedule, that they can be hairless, in underwear and have breakfast while studying, that they can lie down on the cold floor, which you can decree "Pajama Days", that tests to measure memory are not necessary because mom can correct the materials she uses daily, etc. you will see that they are already implementing deschooling.
